Experience

Full Stack Developer | Cherokee Nation — FEB 2023 - APR 2025

- Maintained an acquisition application for USGS
- Updated and maintained EF models with new requirements from client
- Created monthly SSRS reports for internal work done for audits
- Created new RESTful APIs from updated client requirements
- Weekly Agile/Scrum meetings to plan sprints
- Help streamline and build a CI/CD Pipeline to help automate development
- Provided support for end users when needed
- Tech Used: ASP.NET, GitLab, Azure, Jira, JavaScript, SQL

Software Developer | RMCI — FEB 2021 - FEB 2022

- Contract held by RMCI for the Office of Personnel Management (OPM)
- Worked on USAStaffing.gov and [USAHiring.gov](https://www.usahiring.gov)
 - Maintained these [VB.NET](#) applications through tickets created by client in Jira
 - Weekly Agile/Scrum planning for sprints
 - Created and implemented tests for quality assurance
 - Completed peer reviews on Git branch merges for production updates
- Provided support for end users when needed
- Tech Used: [VB.NET](#), Knockout.JS, AWS, TFS, JavaScript, SQL

Full Stack Developer | Rocky Mountain Arsenal — OCT 2020 - Jan 2021

- This contract was meant to convert two separate projects (One a classic ASP application, and one Java based application) into a combined [ASP.NET](#) 5 with Blazor Application.
 - Worked directly with staff members that worked with the wildlife to gather needs for new applications
 - Developed new code based off handsets used with limited internet access.
 - Developed a CRUD application to help with maintenance around office

Full Stack Developer | Department of Commerce — May 2019 - May 2020

- Worked with TMobile and Sprint to build a crowdsourcing application for their 5G networks specifically used by first responders.
 - This application was used as a fact gathering application on how to make the service better for the first responders.
 - Utilized LLMs to help with text analytics, generation and data visualization for this application
-

Full Stack Developer | Department of Defense — NOV 2017 - APR 2019

Same position across 3 different contracts for the Air Force

- Prime focus was to work on an LMS platform for the Air Force Reserves
 - Worked with TFS as our hub for code and incoming tickets for work
 - Worked with SSRS to create a report of errors to help track issues in app
- Developed a monthly status report application used by contractors
 - Used React, ASP.NET and SQL to build
- Worked closely with DBAs to update core SQL entities
- Set up a REDIS cache server for backup
